Log In

1. Open the game link in your browser.

The screenshot shows the login interface for 'The Gleacher Game'. At the top, there is a banner with the word 'Gleacher' in a colorful, stylized font. To the left of the banner are icons of a forklift and a stack of gold coins. To the right are icons of a factory and a modern building. Below the banner is a light blue rectangular box containing the login fields. The 'Login Id' field has the text 'ls_globex' entered. The 'Password' field is filled with seven dots. Below these fields are two buttons: a grey 'Register' button and a green 'Login' button.

2. Enter your login ID and password. Both fields are case-sensitive.
3. Click the login button.

Map

After logging in to a new game, you will see a screen that looks like the following:

The top row shows your team name, the game day, the current cash balance, the game status, your username, and the logout button. The game status may be suspended, running, or done.

There are four controls above the map:

- The “Chat Panel” button opens a window where you can chat with members of your team or other teams.
- The “History” button opens a table showing all the actions taken by your team.
- The “Scoreboard” button shows all the teams ranked by cash position (cash balance - debt).
- The “Open Report” dropdown opens a list of useful reports (see the Reports section below).

Your home region is outlined in red dots on the map and contains three icons: headquarters (HQ) , factory , and distribution center (DC) .

- The HQ icon opens the HQ panel, where you can manage all aspects of the company from a centralized dashboard.
- The factory icon opens a factory panel where you can manage production and shipments to DCs from the factory. Products can only be manufactured at a factory.
- The DC icon opens a DC panel where you can manage retail sales, incoming shipments to the DC, and outgoing shipments from the DC. Products can be sold to retail customers only through a DC.

There are similar icons for other teams’ factories, DCs, and HQs. Clicking on these icons provides limited information about those teams.

Clicking on a region opens a region panel where you can see information on the region’s inventory, factories, and DCs. You can manage retail prices, factory capital and labor, and DC status from this panel.

Key Controls

Icons

 Refresh the information shown in a panel or window. the game must be refreshed manually aside from a few exceptions: (1) game day, cash balance, and game status above the map, (2) cash balance in the HQ panel, (3) incoming chat messages.

 Open a panel or window with more details.

 Filter a column in a table.

 Sort a column in a table.

 Reveal additional section of columns in table.

 Reveal all additional columns in table.

 Open the daily plot for a metric.

 Download data.

 Edit a parameter, such as retail price, daily advertising amount, shipping agreement reorder point, shipping agreement priority, factory capital, or factory daily labor expense.

 **ADD NEW +** Create a new item, such as a shipping agreement, bond issuance, or dividend payment from a panel.

 Create a new item, such as a shipping agreement, from a consolidated table.

 Clone an existing item, such as a shipping agreement or product design.

Tool Tips

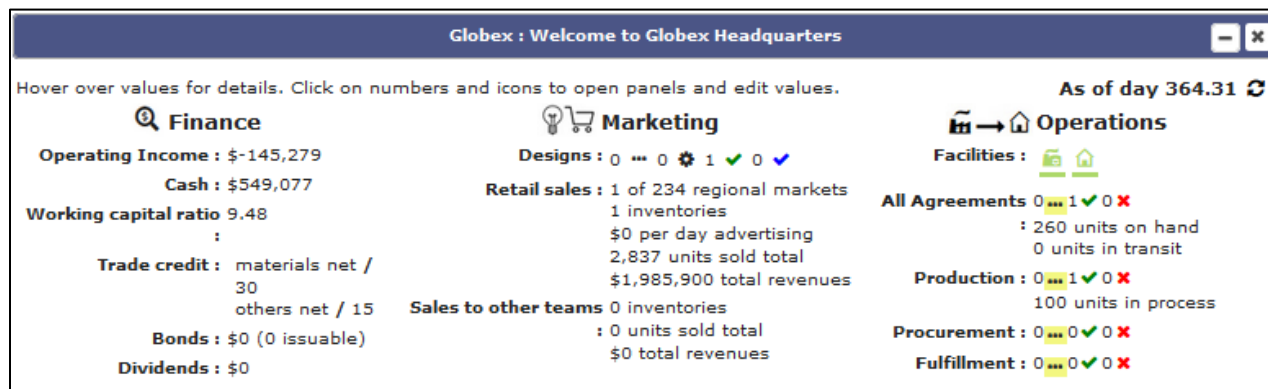

- For many of the values, labels, and icons displayed in the game, you can hover your cursor over the item to see more information about the value.
- For most tables, you can hover your cursor over a column label to see information about the column. If there are two rows of column labels, hover over the 2nd row.

Warnings

- Do not enter any commas, dollar signs, or other special characters as inputs in the game.
- Once construction of factories or DCs is initiated, it cannot be stopped and the building cannot be renamed.
- Once the development of a product design is started, it cannot be stopped and the product cannot be renamed.
- Factories, DCs, and the intellectual property from developed products cannot be sold and have no salvage value.

Headquarters (HQ)

The HQ panel is a centralized dashboard from which you can manage all aspects of the company by functional area: finance, marketing, and operations.

Finance

1. **Operating Income:** This value shows your prior quarter's operating income (EBIT). Click to access the financial statements.
2. **Cash / Emergency Loan:** This value shows your current cash position, which is equal to your cash balance minus your emergency loan balance. The label is "Cash" if the value is positive and "Emergency Loan" if the value is negative. It updates automatically without refreshing the panel.
3. **Working capital ratio:** This value shows your current ratio. Click to access the working capital report.
4. **Trade credit:** This value shows your trade credit terms. It is not clickable.
5. **Bonds:** The first value shows the current balance of bonds payable less unamortized discount. The second value, in parentheses, shows the number of bonds currently issuable before you are downgraded to the next credit rating. Click the first value to open the long-term debt panel used for issuing and redeeming bonds.
6. **Dividends:** The first value shows dividends paid. Click this value to open the dividends panel used for issuing dividends. If there is a dividends payable balance, it is displayed after the dividends paid value.

Marketing

7. **Designs:** Click , , , or  next to this line to open, or switch to, the product design table. Each icon filters the table for a different product design status. Once in the table, you can use the checkboxes above the table to change the status filter.
 - o : Filters the table for designs that have not started development.
 - o : Filters the table for designs that are in development.
 - o : Filters the table for designs that are developed and ready for factory production.
 - o : Filters the table for the designs of products that have been acquired from other teams.
8. **Retail Sales:**
 - o **Regional markets:** This value shows the number of regional markets, defined as product markets in each geographic region, in which you have sold at least one unit. Click to open the Regional Markets table where you can cumulative revenue, unit sales, concentration, and

average retail price in each regional market, and to conduct market research through focus groups.

- o **Inventories:** This value shows the number of inventories or stock keeping units (SKUs) held by your team. Each product at each DC is treated as a separate SKU. Click the value to open or switch to the Consolidated Inventories table set to retail view, where you can see information for retail sales by SKU, change retail prices, and manage focus groups.
- o **Advertising:** This value shows the current daily advertising spending across all of your SKUs. Click the value to open or switch to the Consolidated Inventories table set to advertising view, where you can see information for retail sales by SKU and manage advertising spend.
- o **Units sold total:** This value shows cumulative units sold retail. Click the value to open a daily plot of retail unit sales by SKU.
- o **Total revenues:** This value shows cumulative revenue from retail sales. Click the value to open a daily plot of retail revenue by SKU.

9. Sales to other teams:

- o **Inventories:** This value shows the number of SKUs that your team has agreed to sell to other teams. Click the value to open or switch to the Consolidated Inventories table set to wholesale view.
- o **Units sold total:** This value shows cumulative units sold wholesale. Click the value to open a daily plot of wholesale unit sales by SKU.
- o **Total revenues:** This value shows cumulative revenue from wholesale sales. Click the value to open a daily plot of wholesale revenue by SKU.

Operations

10. **Facilities:** Click factory  and DC  icons to open panels for managing those facilities.
11. **All Agreements:** Click , , or  next to this line to open or switch to the Consolidated Shipping Agreements table set to all agreements view. Each icon filters the table for a different agreement status. Once in the table, you can use the dropdown above the table to switch views and check boxes to filter for pending, running, and/or not running.
 - o : Filters the table for pending agreements.
 - o : Filters the table for running agreements.
 - o : Filters the table for not running agreements.
 - o **Units on hand:** Click this line to open a daily plot of units in on-hand inventory by SKU.
 - o **Units in transit:** Click this line to open a daily plot of units in in-transit inventory by SKU.
12. **Production:** Click , , or  next to this line to open or switch to the Consolidated Shipping Agreements table set to production view, which shows all shipping agreements for shipments originating in one of your factories. These agreements control your manufacturing.
 - o **Units in process:** Click this line to open a daily plot of units in work-in-process inventory by SKU.
13. **Procurement:** Click , , or  next to this line to open or switch to the Consolidated Shipping Agreements table set to procurement view, which shows all shipping agreements for shipments sent to you by another team. These agreements control import trade.
14. **Fulfillment:** Click , , or  next to this line to open or switch to the Consolidated Shipping Agreements table set to fulfillment view, which shows all shipping agreements for shipments sent by you to another team. These agreements control export trade.

Factories

Introduction to Factories

The only way to manufacture products is in a factory. Each factory's production capacity is based on its technology type, invested capital, daily labor expenditure, and the size of the batch in production. Factories can be shut down, but they cannot be sold and have no salvage value. See the Gleacher Game Case Brief for more information.

Clicking a factory icon  on the map or in the HQ opens a panel where you can manage that specific factory. You can view that factory's parameters, work-in-process inventory, and outgoing shipping agreements, initiate new shipping agreements from the factory, and edit shipping agreement priority levels. The panel does not auto-refresh. It can be manually refreshed using the refresh icon at the top right.

Pilot Factory in Globex [Globex] [PROCESSING]

Name : Pilot Factory in Globex
Owner : Globex
Location : Globex
Status : PROCESSING
Technology : Bench
Land expenditure : \$ 100,000

Price : \$ 700 

Total retail sales : 3,048 units 

2. Click the pencil  next to Status.

Status : READY 

Pending : SHUTDOWN 

3. Click  and follow the confirmation prompts to cancel the shutdown.

Shipping Agreements for Production, Distribution, and Trade

Introduction to Shipping Agreements

- There must be a shipping agreement to manufacture a batch of product at a factory or send it to a DC. Sales can be internal transfers to one of your own DCs or external sales to (purchases from) another team.
- The origin can be a factory or a DC. The destination can only be a DC.
- Each shipping agreement is recurring. Reorders are controlled through reorder points. The buyer sets a reorder point for each incoming shipping agreement, and this triggers a new order as soon as the level of work-in-process inventory + in-transit inventory + on-hand inventory for the SKU drops to or below the reorder point.
- The buyer can stop ordering temporarily by setting the reorder point to -1 or permanently by terminating the shipping agreement.
- An order will not ship without sufficient on-hand inventory.
- The seller can set a priority level for each shipping agreement, and the order with the highest priority value is processed first.
- For shipping agreements with equal priority, the agreement that has waited the longest since it was last processed takes precedence.

Shipping Agreements for Production

- The factory manufactures one batch at a time, and each batch ships once production is complete.
- The destination can be one of your own DCs or another team's.

Shipping Agreements for Internal Distribution

- Products can be shipped from one of your factories to one of your DCs, or between DCs.
- You can edit the terms of an internal shipping agreement anytime.

Shipping Agreements for Trade

- Products can also be shipped from one team to another.
- The seller must be the first to create a shipping agreement and send a proposal to the buyer.
- Buyers and sellers can propose and counter propose revisions prior to accepting the agreement.
- The buyer must accept the agreement for it to become active.
- An active agreement's terms cannot be changed, but either side can terminate it.
- The buyer can change an agreement's reorder point at any time.
- The seller can change an agreement's priority at any time.
- The seller pays for shipping.

Overview of the Consolidated Shipping Agreements Table

- Click any , , or  icon in the Operations part of the HQ panel to open the consolidated shipping agreements table. (See *Headquarters* section for more details.)

Consolidated shipping agreements for Globex As of day 392.67     

☐ Pending 
☒ Running 
☐ Not Running 
☐ Batches > 0
 ☐ Days waiting > 0

View : All Agreements Search:

Route	Product	Terms	Priority	Reorder point	Days waiting	Batches	Projected contribution per unit Margin	
	Name							
 	Heart View	100 @ \$100	0	500	15.75	34	\$360	   
 	Heart View	100 @ \$100	1		0	1	\$-200	   

Create a Brand New Shipping Agreement

- Click  above the consolidated shipping agreements table, or **ADD NEW +** in the outgoing shipping agreements section of a factory or DC panel, to create a brand new shipping agreement. Follow the prompts to select origin, destination, and product. This will open a shipping agreement terms window to edit the terms of the agreement.

Clone an Existing Shipping Agreement

- Click  next to an existing agreement in the consolidated shipping agreements table, or in the outgoing shipping agreements section of a factory or DC panel, to clone that agreement. Follow the prompt to select destination(s) and product. This will save a copy of the agreement for each destination that you selected.
- You can send the proposed agreement to the buyer as is or edit its terms before sending.

Edit a Shipping Agreement (Quick Edits)

- Click  to the right of a shipping agreement in the consolidated shipping agreements table, or in the shipping agreement sections of a factory or DC, to make some quick edits to that agreement.
 - You can only edit one agreement at a time.
 - For an internal agreement or an unproposed agreement for another team, you can edit shipping mode, units per batch, transfer price per unit, priority, and reorder points in this table.
 - For an agreement with another team that has been accepted, you only edit priority.
 - For an agreement with another team that has been proposed but is still pending, you will be taken to the full shipping agreement terms panel.
- Enter the new value(s). Click  to proceed or  to cancel.

Edit a Shipping Agreement (Detailed Terms)

- Click the text in the terms box for a shipping agreement in the consolidated shipping agreements table, or in the shipping agreement sections of a factory or DC, to edit the detailed terms of that agreement. This will open the shipping agreement terms panel.

- Edit the terms, click save or cancel, and follow the confirmation prompts.

Overview of Shipping Agreement Terms

- **Order quantity** specifies the number of units in the shipment. If the shipment is triggered but the seller does not have enough units to ship, it waits until enough units are available.
- **Unit price** is the price per unit paid by the buyer to the seller when the inventory is shipped.
- **Ship mode** specifies whether the units are shipped by mail or container. Each batch is shipped on its own. Two or more batches cannot be combined in a single shipment. Mail is faster but usually more expensive per unit. Containers are slower but can be less expensive. Containers hold up to 1,000 units and mail is sent in packages of 10 units. If you send fewer units, you pay for the full container or package. Costs and transit times are as follows:
 - o **Container within a region:** free; 1 day
 - o **Container between regions:** \$10,000 per 1,000 units; 21 days
 - o **Mail within a region:** free; 1 day
 - o **Mail between regions:** \$400 per 10 units; 3 days
- **Franchise fees** are flat fees paid by the buyer to the seller. These can be (1) one-time fees paid at the inception of the agreement, (2) ongoing fees paid at the end of each day the agreement is active, or (3) revenue sharing where the buyer pays a set amount and/or a percentage of the retail price back to the seller each time the buyer sells a unit of the inventory to a retail customer.
- **Slotting fees** are flat fees paid by the seller to the buyer. These can be one-time fees paid at inception or ongoing fees paid at the end of each day the agreement is active.
- The agreement can include minimum and maximum **limits on the reorder point** value that the buyer can set. A minimum reorder point, for example, can ensure that the buyer holds a certain amount of inventory. The agreement can also include **limits on the priority** value that the seller can set and **limits on the retail price** that the buyer can set.
- **Termination** specifies a minimum number of days that the agreement will be active from the moment it is activated. If the either team terminates the agreement before the termination period has elapsed, that team pays the specified penalty to other team. There is also an option to let the buyer return the unsold inventory to the seller at a prearranged price after the agreement is terminated. To initiate the return, the buyer should click on the  icon in the batches column of the Incoming Shipping Agreements table. If returns are allowed there will be a  icon in the batches table that opens.
- The **penalty for late shipments** specifies how many days the seller has to ship an order after the buyer requests it. If it takes longer to ship the order, the price for those units decreases by a specified percentage per day for each day that it is late until the order is shipped. If the penalty reaches 100%, the buyer pays nothing for the order when it is finally shipped. The lateness penalty is prorated over fractions of a day. Both the incoming and outgoing shipping agreement tables include a column showing each agreement's delay at that moment.
- Either team can enter other terms that are binding but must be enforced by the teams instead of the software.
- There is a box at the bottom of the panel where students can enter comments for a particular revision of the terms.

Manage Production Shipping Agreements

A factory will only manufacture a given product for a given destination if a shipping agreement for that product exists between the factory and that destination. Each product at each destination is treated as a separate stock keeping unit (SKU). If the shipping agreement for the SKU does not exist, first create the shipping agreement.

1. To manage existing shipping agreements originating at a factory, open the consolidated shipping agreements table in production view. (See *Headquarters* section for more details.)

As of day 371.36

Manage Fulfillment Shipping Agreements

1. To send an outgoing shipping agreement to another team, follow the instructions to *Create a Brand New Shipping Agreement* or to *Clone an Existing Shipping Agreement*.
2. Click the pending icon next to Fulfillment in the HQ panel to open the consolidated shipping agreements table in fulfillment view. (See *Headquarters* section for more details.)
 - After the outgoing agreement is saved, the pending icon is highlighted in yellow.
3. Click the  to the right of the agreement to send the proposal or  to delete the agreement.
4. If the receiving team sends a counter proposal, the DC on the map is highlighted in yellow. Open the consolidated shipping agreements table in fulfillment view.

As of day 396.72    

Consolidated shipping agreements for Globex

View : Fulfillment   Pending  Running  Not Running  Batches > 0  Days waiting > 0

Search:

Route	Product	Terms	Priority	Days waiting	Batches	Projected contribution per unit Margin	
	Name						
 	Heart View	20 @ \$450				\$310	   

Showing 1 to 1 of 1 entries

8. Click  to the right of the agreement to review the terms or send a counter proposal,  to accept changes, or  to rescind the offer.
 - If you accept the changes, the receiving team needs to accept the agreement before it goes into effect.
9. Once the agreement is in effect, you can click  to the right of the agreement to edit the priority or  to terminate the agreement.

Product Design and Development

The only way to make a new product is to create a derivative of an existing product.

- Click on  next to Designs in the HQ panel to open the Product Design table filtered for previously developed product designs. (See *Headquarters* section for more details.)

Product Design for Globex

 Hormone	: - 	 Metabolic	: - 
 Cancer	: - 	 Neurotoxins	: - 
 Motion	: - 	 Platform	:  chest 
 GPS	:  GPS 	 Networking	:  2.4 GHz 
 Power	:  Ni-Cd battery 	☐ Finish	: Original 

Comment : N/A 

- Click on the pencil  next to New Product Name to rename the product. You will not be able to change the name after the design is in development.
- Click on the pencil  next to each feature to make changes.
 - You will see the a dropdown with available options for the feature.
 - The brackets next to each option contain its development time (in days), development cost, and materials cost per unit. These are cumulative, and their values will update with each selection.
 - Materials cost is incurred for all selected features, while development cost and development time are only incurred for incremental changes from the parent design.

6. Click **Save** at the bottom of the panel to save the new product design.
7. This takes you back to the Product Design table filtered for ready products. Select the ... filter to see the saved design.

As of day 365.36

	HeartYouToo		... 0	-	\$0	

Showing 1 to 2 of 2 entries

8. Click on the product name to continue editing the design.
 - If you have more than one revision of a design, the product design table shows the most recent revision. Select the All Revs filter in the product design table to see prior revisions.
9. Click to the right of the product in the Product Design table to start development or to cancel the design. Go through the confirmation prompts to implement your selection.
 - Confirming the Start Development selection will subtract the Development Cost amount from operating income, add this amount to other payables, and commence product development.
 - You will not be able to start development if you have an emergency loan balance.
 - Once the product is in development, it will show up under the filter.

Focus Groups

Focus groups let you get first-hand willingness to pay (WTP) data from a small group of customers in a specific product market and geographic region about a specific product design. Each focus group incurs a cost in money and time. The customers surveyed are randomly selected from those remaining in the market at the time the focus group is run. Because the makeup of this remaining population can change as customers who have made purchases leave the market, your WTP results can also change depending on when in the market lifecycle you run the focus group.

1. Click on the regional markets line next to retail sales in the HQ panel to open the Regional Markets table. (See *Headquarters* section for more details.)

As of day 380.40

Regional Markets for team Globex

Search:

- On the Add New Stocks and Dividend panel, enter the game day on which you want the dividend to be paid out and the dollar amount. Do not use commas. Click Declare and follow the confirmation prompts.
- The scheduled dividend shows up as a new row in the Dividend table of the Equity panel. The status of the dividend is "PENDING" until it is paid, at which point the status changes to "PAID". To cancel the payment of a pending dividend, click Cancel and following the confirmation prompts.

Reporting

Headquarters Reports

Finance

- **Financial Statements:** Click the value next to **operating income** in the HQ to see the consolidated financial statements report. It is also accessible using the “Open Report” dropdown above the map. This report contains the firm’s consolidated income statement, balance sheet, and cash flow statement. Use the dropdowns at the top of the report to select the team, statement, and time period: days, weeks, quarters, and years. Only quarterly and annual statements are available for other teams. Click the \$ symbols in the balance sheet or income statement to switch to a % view and vice versa. Clicking the \$/% at the top of the column switches the entire statement. Download a statement by clicking at the top right of the page. See the *Consolidated Financial Statements* section below for more details.
- **Working Capital Analysis:** Click the value next to **working capital ratio** in the HQ to see this report. It is also accessible using the “Open Report” dropdown above the map. This report contains the firm’s current assets, current liabilities, total working capital and current ratio, non-cash working capital and current ratio, and quick ratio. Use the dropdowns at the top of the report to select the team and time period: days, weeks, quarters, and years. Only quarterly and annual information is available for other teams. Click on an item label to see a chart of the values for that item. Download the report by clicking at the top right of the page.

Marketing

- **Product Design:** Click one of the icons next to **designs** in the HQ to see the product design table, which contains data on all of your product designs. Note that there is a similarly named Product Designs report accessible from the “Open Report” dropdown above the map, which contains less data but can be sorted by product feature. Hover your cursor over the second row of column labels in the product design table for information about each column. Expand the columns in the table using the at the top-right or click on a product's name to see open a Product Configuration panel with detailed information about the product. Click the value in units on hand to see a daily plot of on-hand inventory for a product. Click the value of best WTP to see the Focus Groups report. Click the value of product contribution to see a graph of contribution over time for a product. Click the at the top-right to see the Product Line Architecture report.

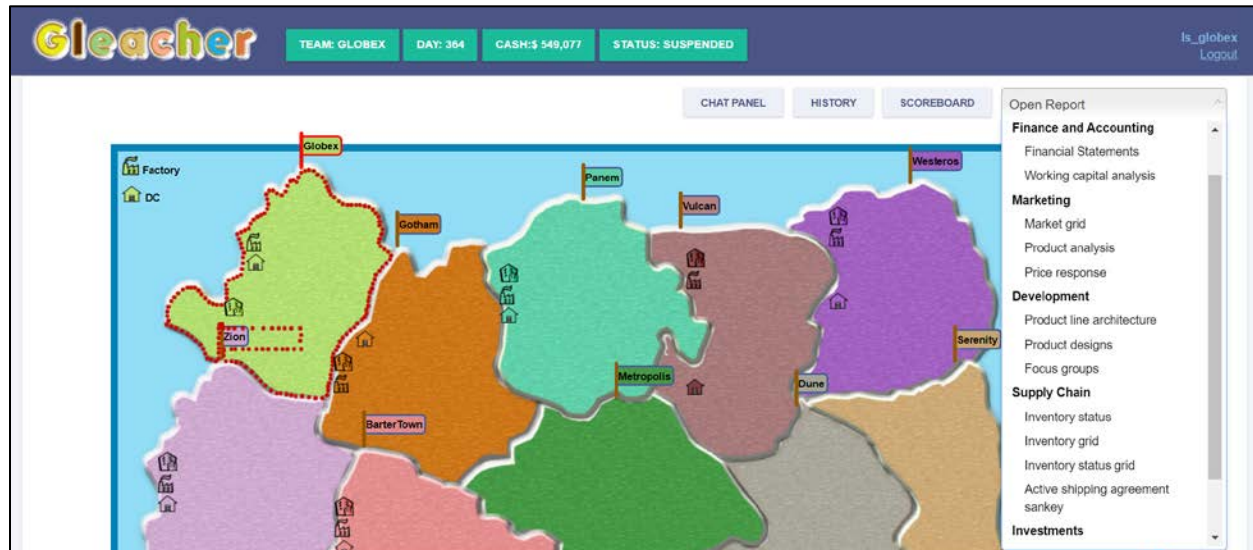

- **Product Line Architecture:** Click the  at the top-right of the **product design** table to see this report. It is also accessible using the “Open Report” dropdown above the map. The report shows an organizational chart of parent and derivative products. Click on a product in the report to open its Product Configuration panel.
- **Regional Markets:** Click the regional markets line next to **retail sales** in the HQ to open the regional markets table where you can cumulative revenue, unit sales, concentration, and average retail price in each regional market. Click on a value in the Max WTP column to see the Focus Groups report. Click the  at the top-right to see the Market Grid report.
- **Market Grid:** Click the  at the top-right of the **regional markets** report to see the Market Grid report. It is also accessible using the “Open Report” dropdown above the map. This report displays a selected retail sales metric across a matrix of all product markets and regions in the game. The metrics are cumulative unit sales, cumulative revenues, average retail price, fraction of the market served, or concentration of sales by team. Select a metric using the “show” dropdown at the top of the report. Use the “market grid for” dropdown to filter the market grid for a specific team. Download the data by clicking  at the top right of the page.
- **Focus Groups:** Click on a WTP value in the **product designs** table, **regional markets**, or **consolidated inventories** table to see this report. It is also accessible using the “Open Report” dropdown above the map. The report contains a list of focus groups that have been run. It is sortable by the features in each product design. The WTP column shows max WTP; click on this value to see data for individual focus group participants. Click on the design name to see summary focus group results, including median WTP.

Operations

- **Consolidated Inventories:** Click on one of the **inventories** or **advertising** lines in the HQ to see the consolidated inventories table in retail, advertising, or wholesale view. The table shows information for each SKU. Expand the columns in the table using the  at the top-right. Click the value of product contribution to see a graph of contribution over time for an SKU. Click the values of retail unit sales and units on hand to see daily plots of those metrics. Click the WTP value to open the Focus Groups report. Click the  at the top-right to see the Inventories Grid report.
- **Inventories Grid:** Click the  at the top-right of the window above the **consolidated inventories** table to see the Inventories Grid report, which displays one of several inventory management metrics across a matrix of your products and DCs. The metrics are contribution, reorder point, service rate, average days to ship, retail price, average retail price, retail units, retail revenues, days supply on hand, units on hand, units inbound, units in process, units total, all incoming agreements, active incoming agreements, all wholesale agreements, active wholesale agreements, start day, days agreement active, max willingness to pay, all median willingness to pay, all focus group participants, advertising, total advertising. There is a definition of the selected metric at the top of the report. Note that there is a similarly named Inventory Grid report accessible from the “Open Report” dropdown above the map, which contains a limited set of metrics – units on hand, price, and days supply on hand – across all teams’ products and DCs.
- **Consolidated Shipping Agreements:** Click on one of the icons next to all agreements, production, procurement, or fulfillment to open the consolidated shipping agreements table in all agreements, production, procurement, or fulfillment views. The table shows information for each shipping agreement. Expand the columns in the table using the  at the top-right.

“Open Report” from Map Screen

There are several reports accessible through the Open Report dropdown above the map.

Finance and Accounting

- **Financial Statements:** See the description in the *Headquarters Reports* section, as well as more detailed information in the *Consolidated Financial Statements* section below.
- **Working Capital Analysis:** See the description in the *Headquarters Reports* section.

Marketing

- **Market Grid:** See the description in the *Headquarters Reports* section.
- **Product Analysis:** This report shows the current price, current on-hand inventory, and cumulative retail sales for each product at each DC. Use the dropdowns above the report to filter by manufacturer, owner, and region.
- **Price Response:** This report provides data on average retail units sold per day at each price for a given product in a DC, as well as the ability to plot various relationships in a graph above the data table. Switch to a different product by clicking  next to the product name at the top of the page. Download the data by clicking  at the top right of the page.

Development

- **Product Line Architecture:** See the description in the *Headquarters Reports* section.
- **Product Designs:** This report lists each product design with the product's name, its development status, the development start and ready dates, the development time and cost of the design, the material cost per unit, and each feature in a separate column. The benefit of this report, relative to the product design table accessible from the HQ, is that you can sort by feature.
- **Focus Groups:** See the description in the *Headquarters Reports* section.

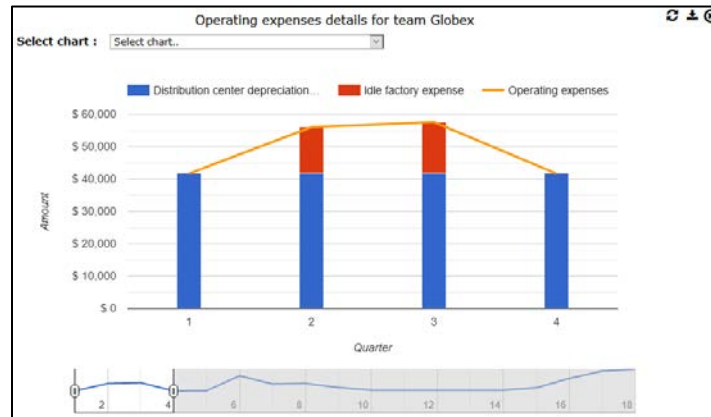

Supply Chain

- **Inventory Status:** This report shows a snapshot of your supply chain at a given point in time: batches being produced at the factory, batches in transit to the DC, on-hand inventory levels at the DC, stocked out items, and inactive inventory. The data includes product names, locations, quantities, days remaining until new batches are produced and delivered, and estimated days remaining until on-hand inventory runs out.
- **Inventory Grid:** This report contains a limited set of metrics – units on hand, price, and days supply on hand – across a matrix of all teams' products and DCs.
- **Active Shipping Agreement Sankey:** This report visualizes product flows between origin and destination for all of your active shipping agreements. Dropdowns above the report filter by product, focus on active vs. operating agreements, and switch between the order quantity, total batches, total units, and total returns metrics.

Investments

- **Factories:** This report shows all factories in the game by name, owner, region, and status. Additional information is shown only for your factories: units, product, throughput in units per day, overhead, technology type, active capital expenditures, pending capital expenditures, current daily expenditures, pending daily expenditures, unconsolidated income the factory's income statement. The report is not downloadable, but it is possible to copy/paste the data into a spreadsheet for further analysis.
- **Distribution Centers:** This report shows all distribution centers in the game by name, owner, region, status, and unconsolidated income from the DC's income statement. The report is not downloadable, but it is possible to copy/paste the data into a spreadsheet for further analysis.
- **Active Factories Grid:** This report provides an overview of your production capacity by factory type and region.

6. On the income statement and balance sheet, click on a row label to see a graph of that item over time. The example below is a graph of other operating expenses.

7. On the income statement and balance sheet, click the \$ icon next to the column labels to switch the statement to a common-size view. Click the % icon that appears in the same spot to reverse the action. To switch the view for a single line item, click the \$/% icon next to that line item.

	\$ Quarter 4	Quarter 3	Quarter 2	Quarter 1

Plots

Game panels and reports contain daily plots for certain inventory and sales-related metrics:

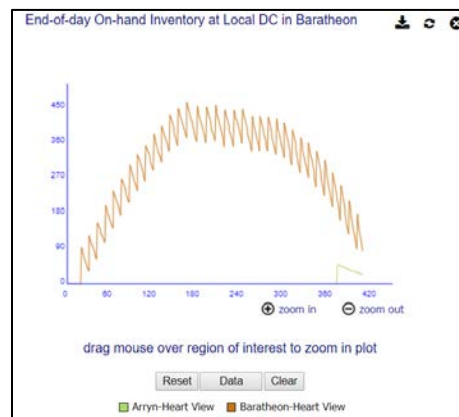

Inventory

- Work-in-process inventory
- In-transit inventory
- On-hand inventory
- Total inventory

Sales

- Advertising
- Retail price
- Retail unit sales
- Retail revenues
- Wholesale unit sales
- Wholesale revenues

1. To access a plot from a factory or DC panel, click the  icon next to the metric. On the HQ panel, click on the lines for number of units or \$ of revenues.

2. Click the boxes next to items in the legend to hide or show those items.
3. Select an area of the plot with your mouse to zoom in on that area.
4. Click the “Data” button to view the underlying data.
5. Click  in the top-right corner of the window to download the data.
